

PINECONE CHRISTMAS TREES

What we used:

- * a 4" to 5 1/2" tall pinecone
- * a 2" tall ceramic pot
- * acrylic paint - green & red
- * paint brush
- * hot glue to glue the pinecone to the pot
- * 10 mm pom-poms - red & white
- * 10 mm gold Christmas bells
- * Tacky Glue for gluing the ornaments on
- * ribbon & ric-rac for decorating
- * star for the top of the tree

1. Paint the pinecone and pot separately. Let them dry and then hot glue them together.
2. Hot glue your star on top.
3. Use Tacky Glue to glue down your pom-poms and any other ornaments. To prevent little children from pouring on the glue, I like using cotton swaps that they can dip into the glue.
4. Add any bows or you can add some white glitter glue and let dry.
